Function overview

With the **Mono Bluetooth™ Headset MBH10**, you can control incoming and outgoing phone calls while you listen to music from your phone. You can connect your Bluetooth™ headset to two Bluetooth™ devices at the same time so that you can receive calls from two phones without having to disconnect and reconnect.

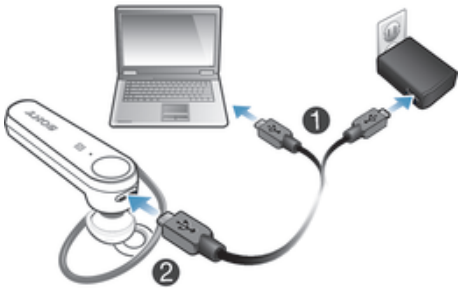
Basics

Charging the battery

Before using the **Mono Bluetooth™ Headset MBH10** for the first time, you need to charge the headset for approximately 2.5 hours. Sony chargers are recommended.

To charge the battery



1. Plug one end of the USB cable into the charger (or into the USB port of a computer).
2. Plug the other end of the cable into the Micro USB port on your Mono Bluetooth™ Headset MBH10.

Turning the headset on and off

To turn on the headset

- Press and hold down the Power key until the notification light turns green.

To turn off the headset

- Press and hold down the Power key until the red notification light flashes once.

Pairing the headset with compatible devices

Before you can use the headset, you need to pair it with a Bluetooth™ compatible device, for example, a phone. There are two ways to pair the headset: manually, and automatically using NFC. After successful pairing, the headset connects to the Bluetooth™ compatible device as soon as the headset is turned on and within range. After that, you can also pair the headset with a second Bluetooth™ compatible device in the same way.

To manually pair the headset with a Bluetooth™ device

1. Make sure the Bluetooth™ device has the Bluetooth™ function turned on.
2. Turn off the headset.
3. **Headset:** Press and hold down the Power key until a green notification light starts flashing rapidly.
4. **Bluetooth™ device:** Scan for Bluetooth™ devices, then select **MBH10** in the list of available devices.
5. **Bluetooth™ device:** Follow the pairing instructions that appear. If a passcode is required, enter "0000".

To automatically pair your headset with a Bluetooth™ device

1. Make sure that the Bluetooth™ device has the NFC function turned on and that the screen is active and unlocked.
2. Place the Bluetooth™ device over your headset so that the NFC detection area of each device touches the other.
3. Follow the pairing instructions that appear on the Bluetooth™ device. If a passcode is required, enter "0000".

! The device used in this illustration is for illustration purposes only and may not accurately depict the actual device used.

You can pair your headset with a compatible device using NFC even when the headset is turned off.

Adjusting the volume

To change the call volume

- During a call, press the Volume key.

You hear a slightly longer, higher-pitched beep when the volume reaches the maximum level. After the volume reaches the maximum level, the volume goes down if you keep pressing the Volume key.

Wearing instruction

You can wear the headset with or without the ear hook, and on either the left or right ear.

Call handling

To answer a call with the headset

- When you hear an incoming call signal, press the Call key.

To end a call

- During an ongoing call, press the Call key.

To reject a call

- When you hear an incoming call signal, press and hold down the Call key.

To mute the microphone during a call

- Press and hold down the Volume key.

When the microphone is muted, press and hold down the Volume key again to activate the microphone.

To answer a second call

- When you hear an incoming call signal during an ongoing call, press the Call key. The ongoing call is put on hold.

To reject a second call

- When you hear an incoming call signal during an ongoing call, press and hold down the Call key.

To switch between two calls

- Press and hold down the Call key.

Multipoint technology

Use Multipoint technology to connect your headset to two Bluetooth™ devices at the same time. For example, if you connect your headset with two phones, you can receive calls from both phones without having to disconnect and reconnect.

If you prefer that your headset connects to just one Bluetooth™ device at any given time, you can use Singlepoint mode instead. Singlepoint mode is enabled by default. Before pairing your headset with a new device in Singlepoint mode, make sure that you disconnect it from other devices.

! Multipoint mode consumes more battery power than Singlepoint mode.

To connect your headset to two devices at the same time

1. Make sure that the headset is turned off and that the two Bluetooth devices have the Bluetooth™ function turned on.
2. Press and hold down the Volume key while turning on the headset. After Multipoint mode is activated, a yellow notification light will flash twice.
3. Pair and connect your headset to the two Bluetooth™ devices, one after the other.
4. To deactivate Multipoint mode, press and hold down the Volume key again while turning on the headset. After Multipoint mode is deactivated, a yellow notification light will flash once.

In Multipoint mode, if the connection to the first Bluetooth™ device is lost when you connect to a second device, restart your headset.

Troubleshooting

I cannot answer a second call

- Make sure that your calling device supports the Bluetooth™ headset profile.
- Make sure that the correct calling device is selected.

The headset turns off automatically

- If the headset beeps several times shortly before turning off, the battery level is low. Charge the battery.

Unexpected behaviour

- Restart the headset.

No connection between headset and other device

- Make sure that the headset is charged and within range of the device that you want to connect to. A maximum distance of 10 metres (33 feet), with no solid objects in between, is recommended.
- Disable the Bluetooth™ function in the other device so that all connections are closed, then re-enable the Bluetooth™ function and pair the headset with the device again.

We fulfil the requirements of the R&TTE Directive (1999/5/EC).

FCC Statement

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.

Any change or modification not expressly approved by Sony may void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Industry Canada Statement

This device complies with RSS-210 of Industry Canada.

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.
